

Case Log Guidelines for Orthopaedic Sports Medicine Review Committee for Orthopaedic Surgery

The ACGME Case Log System for Orthopaedic Sports Medicine allows fellows to document their operative experience during the 12-month educational program and enables the Review Committee to monitor programs to ensure that fellows have an adequate volume and variety of experiences appropriate for fellowship education. In the past, fellows used the Case Log System designed for the core residency program to report their cases. The Review Committee has now identified defined case categories (listed here on the following pages) as appropriate for the focused education of orthopaedic sports medicine fellows; the ACGME Case Log System for Orthopaedic Sports Medicine has been revised to identify the CPT codes tracked to each defined case category. The CPT codes available in each category are listed below; note that fellows are NOT expected to report cases using all listed CPT codes. While it is expected that fellows will report cases in each defined case category, there are no minimum case numbers required at this time. The new system is in place now.

To log a case, fellows will continue to identify the patient type (adult or pediatric), and must also identify their role in the case as either Level 1 (primary or supervising fellow surgeon) or Level 2 (assisting fellow surgeon). All procedures at both levels require appropriate faculty member supervision and participation in the case. At this time, both Level 1 and Level 2 participation will count. In addition, fellows must identify a primary CPT code for each case, but should include all additional CPT codes as appropriate. This will allow equivalent tracking of the volume and variety of cases for each fellow, preventing variances based on how cases are coded.

The Review Committee will continue to review the program and fellow Case Log reports as a measure of the depth and breadth of fellow experience. These reports will include all CPT codes entered for all cases. In addition, the Review Committee will review the Tracked Procedures Report as a measure of fellow experience related to the defined case categories. These reports will reflect only the primary CPT codes identified for each tracked case.
