

ACGME Review Committee Faculty Scholarly Activity Decisions

The ACGME Common Program Requirements (Residency and Fellowship versions), effective July 1, 2019, include two choices for dissemination of faculty scholarly activity (see IV.D.2.b) – IV.D.2.b).(2)). The table below reflects the faculty scholarly activity decisions of each Review Committee.

Update: Review Committees are in the process of determining whether to use the One-Year Fellowship Common Program Requirements or the full Common Program Requirements (Fellowship) for their one-year subspecialties and eligible two-year subspecialties. These decisions may affect the faculty scholarly activity requirements. More information will be provided as it becomes available.
